Re: Gold Level Recognition

Dear Matt,

On behalf of the National Biosolids Partnership (NBP), we congratulate you and all of the staff of the Atlantic County Utilities Authority on the successful transition to NBP Tier 3 Gold Level Recognition. Well done!

This designation recognizes that your BMS meets the NBP program requirements and supports excellence in biosolids management practices, augments regulatory compliance, advances environmental performance, and provides meaningful opportunities for public participation.

We are aware of the amount of effort required to satisfy the NBP requirements. We also know that demonstrating and verifying excellence in biosolids management is good for the reputation of your organization, the local environment, and the well-being of your community.

Your program is viewed as a model by those water resource recovery facilities and other organizations following the EMS path. We are pleased to have the Atlantic County Utilities Authority as a part of this international program, demonstrating excellence and leadership in biosolids management.

Sincerely,

Cathy Gerali
Chair, NBP Steering Committee
